

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) An anchoring for strip-shaped traction elements on a supporting structures that are structure that is under tension, ~~especially concrete supporting structures,~~ whereby the traction element is received between comprising a base plate that is adapted to be attached to the supporting structure and a clamping plate that can be clamped against the base plate, and fixed by means of adhesion and clamping, ~~characterized in that~~ wherein the clamping plate (14, 15) is supported on the base plate (3, 6) in a positive fit in ~~the~~ a direction of traction of the traction element (1).

2. (Currently Amended) An anchoring according to Claim 1, ~~characterized in that~~ wherein the clamping plate (14, 15), on either side of the traction element (1) ~~exhibits,~~ comprises, in each case, a downwardly protruding securing tappet (20) which engages, in each case, a securing recess (21) of the base plate (3 or 6, respectively).

3. (Currently Amended) An anchoring according to Claim 1, ~~characterized in that~~ wherein the clamping plate (14, 15) exhibits, on either side, in each case, a securing protrusion (22), which is supported, in each case, against a stop (23) that is connected with the base plate (3, 6).

4. (Currently Amended) An anchoring according to Claim 1, ~~characterized in that~~ wherein the clamping plate (14, 15), with its front surface (24) ~~on the same side as the~~ facing the direction of traction, is supported against two stops (25) that are connected with the base plate (3, 6).

5. (Currently Amended) An anchoring according to Claim 3 ~~or 4~~, ~~characterized in that~~ wherein the stops (23, 25) ~~on the top of the base plate (3, 6) on either side of the clamping plate (14, 15)~~ and/or in the region of the front of the clamping plate (14, 15) are welded-on push blocks.

6. (Currently Amended) An anchoring according to ~~one of the Claims 1-5~~ claim 1, ~~characterized in that~~ wherein the clamping plate (14, 15) ~~may be~~ is adapted to be fixed in its position by means of a positioning device (26), which engages in the direction of traction ~~of the traction element (1)~~ in positive fitting support against the base plate (3, 6).

7. (Currently Amended) An anchoring according to Claim 6, ~~characterized in that~~ wherein the positioning device (26) ~~is applied in such a manner that it may~~ is adapted to be removed from the anchoring.

8. (Currently Amended) An anchoring according to Claim 6, ~~characterized in that~~ wherein the positioning device (26) ~~is~~ comprises a threaded rod (27) ~~that works~~ disposed between the clamping plate (14, 15) and a bridge (28) that is connected with the base plate (3, 6).

9. (Currently Amended) An anchoring according to Claim 6, ~~characterized in that~~ wherein the positioning device ~~exhibits~~ comprises at least one wedge, ~~which works~~ disposed between the base plate (3, 6) and the clamping plate (14, 15).

10. (Currently Amended) An anchoring according to Claim 6, ~~characterized in that~~ wherein the positioning device ~~is~~ comprises a removable threaded collet.

11. (New) An anchoring according to Claim 3, wherein the stops on the base plate are welded-on push blocks.

12. (New) An anchoring according to claim 2, wherein the clamping plate is adapted to be fixed in position by a positioning device which engages in the direction of traction in positive fitting support against the base plate.

13. (New) An anchoring according to claim 3, wherein the clamping plate is adapted to be fixed in position by a positioning device which engages in the direction of traction in positive fitting support against the base plate.

14. (New) An anchoring according to claim 4, wherein the clamping plate is adapted to be fixed in position by a positioning device which engages in the direction of traction in positive fitting support against the base plate.

15. (New) An anchoring according to claim 5, wherein the clamping plate is adapted to be fixed in position by a positioning device which engages in the direction of traction in positive fitting support against the base plate.

16. (New) An anchoring according to claim 11, wherein the clamping plate is adapted to be fixed in position by a positioning device which engages in the direction of traction in positive fitting support against the base plate.
